

# PANORAMA™ Application Note

## Using a PC Converter with a *Panorama PAN6400* Video Distribution Center (VDC)

This application note covers the use of a PC converter with a *PAN6400*. When connected, a wireless keyboard and mouse or PC IR Media Remote are used to control the PC. See Figure 1 for an example of this configuration.

### Connection

To connect a PC converter to the *PAN6400*, complete the following steps:

1. Turn off power to all devices.
2. Connect a 15-pin VGA cable from the PC to the converter.
3. Connect the Composite Video Out port of the source to the input port (red) for that source on the *PAN6400*.
4. Connect IR receiver for the PC IR Media Remote to the USB port on the computer.
5. Connect the IR emitter from the *PAN6400* S1 output port to the IR window of the PC IR Media Remote receiver.
6. Connect the Ethernet CAT5 cable from the room output for the source on the *PAN6400* to the VIM port of the *PANVP500*.
7. Connect the *PANVP500* to the display.
8. Turn power on to all devices.
