

# MUSICA™ Application Note

## Musica Keypad with Local Source

The  
IP-Based  
Distributed  
Entertainment  
Company.

**Products Included:**

*Musica* MU4602 System  
or  
*Musica* MU5066 System

### Introduction

Using a local source in a room allows a user to listen to a source they have complete control over without any other user interrupting the listening experience. Figure 1 depicts a local source connected to a *Musica* system.

**Figure 1** Local source connected to a *Musica* system

### Pre-Wire

To pre-wire for a local source, complete the following steps:

1. Run CAT5e cable for an Audio Port Expansion Interface Module (EIM) connection at the local source location in the room.
2. Run CAT5e cable from from the keypad location to the Audio Port EIM connection.

## Trim

Terminate both ends of the CAT5e with RJ45 modular ends and plug them into the EIM connections.
