

MUSICA™ Technical Bulletin

Power Regulators

The power regulators can be used to incorporate a new *Musica* MU4602 keypad to an MU4601 system or reduce the voltage to a 4601 keypad. This will reduce the amount of heat that the keypad generates because of any excess voltage.

To install regulators, follow the labeling on the regulator and install in line with the power for the keypad. Regulators can be placed at the *Musica* MU4601 ADC (Audio Distribution Center) or in the wall at the keypad.

Products Included:

Musica MU4602

Musica MU4601

MU4602KP
