

Switch Qualification Sheet

The following switch qualifications are recommended by *NetStreams* for installations where a third party switch is desired:

- 1000 Mbps switched to each port, non-blocking
- IGMP v2 compliant (RFC 2236 compliant)
- IGMP Querier support (discovers which network devices are members of a multicast group)
- 10 Gbps port required for cascading

Contact your *NetStreams* Sales representative for more information.

CAUTION! *NetStreams* technical support is provided for all switches purchased directly from *NetStreams*. We do not provide technical support for third party switches. We recommend that you request technical support from the manufacturers of these devices.
