

RELEASE NOTES

StreamNet® Application Suite, Dealer Setup & Firmware

AUGUST 26, 2011

Product Versions Released:

- StreamNet Application Suite: Version 1.08.05
- StreamNet Dealer Setup: Version 2.70.05
- StreamNet Firmware: Version 2.70.05

OVERVIEW

Document Purpose:

This document contains the release notes for StreamNet Application Suite, StreamNet Dealer Setup and Firmware. The following sections describe the release in detail and also provide other required information.

Product Documentation:

Refer to the following web links for more details about the StreamNet Technology products:

<http://www.netstreams.com/digilinx.php>

http://www.clearone.com/audio_video_distribution_control.html

SYSTEM REQUIREMENTS AND INSTALL

System Requirements:

- Microsoft Windows XP, Vista or 7 (32 bit or 64 Bit OS)
- Intel or AMD 600 MHz class processor (1 GHz or higher recommended)
- 512MB RAM Minimum (1GB or higher recommended)
- 300MB hard disk space minimum (Additional space is required to store the project files that are created using StreamNet Dealer Setup based on the project file size)
- Ethernet Network Interface to connect your computer to StreamNet Network
- Admin permission to install the software

Download

Download the **StreamNet Application Suite 01.08.05.zip** file containing the application from either the ClearOne or NetStreams web site. You must first login to the website with a correct user and password, then go to the Resource Library. The file will be visible and available for downloading. If you have not logged in properly, the file will not be visible.

Install

After successfully downloading the zip file containing the application, open it and run the included program and follow the instructions provided.

Uninstall

It is not mandatory to uninstall the previously installed StreamNet Application Suite.

FIXES IN THIS RELEASE

Bug fixes included in this release:

- Tools/Launch Demo Picks Old Project File
- SpeakerLinX reset during source selection
- Renaming a TH100 makes a duplicate Room Entry
- Source Changes Crashes SL250/9250/254
- VL9300 Video has Jagged Lines at 480i
- Add Media Server - Name the streams - They conflict with themselves
- Skin changes crashes Dealer Setup

KNOWN ISSUES IN THIS RELEASE

- Devices do not DHCP properly after auto IP without a server then having power pulled
- BitStream Pass through in VL9300 Decoder is not supported
- Sony Camera not fully supported

PRODUCTS AFFECTED WITH THIS RELEASE

All StreamNet connected devices are affected by this release.

While the Software is compatible with all revisions of StreamNet connected hardware, it is not recommended that devices on any system run with different versions of Firmware. Running devices with different versions of Firmware can lead to system instability and loss of features.

TROUBLESHOOTING

Cable Connectors:

Make sure that the system is setup correctly. Refer to the Installation and Design Guide for detailed instructions on how to connect devices and terminate wires in the system. You can download this manual in the dealer section of the NetStreams and ClearOne websites:

<http://www.netstreams.com/Documents/InstallandDesign.pdf>
<http://www.clearone.com/Documents/InstallandDesign.pdf>

Firewall:

You must temporarily disable any firewalls that may be running on your PC.

Diagnostics Tool:

You can run the Diagnostics Tool by going to Help -->Diagnostics from the menu in the Dealer Setup Program. This tool enables you to view the network activity on your PC as it relates to the StreamNet network. The Diagnostics Tool displays information regarding your network connections such as Network Card Name, Connection IP Address, Address Type (Static or DHCP), Subnet Mask, and the number of devices found on the network, if any. The Diagnostics Tool also detects problems and provides a brief explanation of any detected problems found in your connection.

Restart:

Restarting your PC will enable network setting changes that have occurred during setup. Close the Setup Program application then reboot.

LAST RELEASE DETAILS

- StreamNet Application Suite: Version 1.08.04
- StreamNet Dealer Setup: Version 2.70.03
- StreamNet Firmware: Version 2.70.04
- Date: 06/30/2011
