

NetStreams IP Audio Video & Control

D I G I L I N X

THE ULTIMATE IP A/V EXPERIENCE

DIGILINX IP AUDIO/VIDEO AND CONTROL SYSTEM

The *NetStreams'* DigiLinX IP Audio, Video and Control system is incredibly easy to use and enjoy. Imagine coming home and pressing just one button to activate multiple actions all together - the lights turn on, the air conditioning changes to your preferred "at home" setting, and your favorite music begins to play in your favorite room(s).

Multi-Room IP Audio, Video and Control creates a seamless web where audio, video, gaming, HVAC, security, and lighting all reside on one system, making for a truly interactive experience. While many talk about the vision of **SEAMLESSLY INTEGRATING** audio, video, control and computer technologies on the same IP-Based home network, only *NetStreams* delivers on that promise.

DigiLinX integration with worldwide leaders in HVAC, Lighting and Security

TouchLinX TL430 4.3" LCD touch screen & TouchLinX TL700 7" LCD touch screen

The TouchLinX in-wall touchscreens are elegant and sophisticated solutions for the DigiLinX system with many options and features to **SIMPLIFY YOUR LIFE**.

- **Attractive Touch Screens** Bring functionality to your home with the widescreen 7" or 4.3" screens. Touchscreens allow you to control every aspect of your home from lighting and temperature to audio and video.
- **Control from Anywhere** DigiLinX IP-Based technology allows you to control your system from any device with a browser*, from PC's to handhelds.
- **Globalization** *NetStreams* is the world leader in digital entertainment networks based on Internet protocol (IP) technology. DigiLinX supports over 15 languages and international language meta-data.
- **IP Intercom** DigiLinX allows you to communicate throughout your home with room-to-room paging, room monitoring and and answering the door using the intercom.

* Adobe Flash support required

SIMPLE, ELEGANT SYSTEM CONTROL

IP AUDIO THAT WORKS BEAUTIFULLY

Show your personality in the design of your home environment. Design is about personal expression. DigiLinX allows that expression to be seen and heard with the TouchLinX touch pad, **CUSTOMIZABLE** in look to almost any environment. Show your style, with the most advanced IP Multi-Room Audio distribution available today.

Send in your paint chip, wallpaper sample or photo and match your touch pad to the Décor in your home.

TouchLinX TLA250 IP touch pad

The TouchLinX in-wall touch pad is a **BEAUTIFUL** way to express yourself in your home while still maintaining the technology to enjoy the Music throughout your home.

- **Décor Services** To allow complete customization of the skin, DigiLinX Décor Services offers: ColorMatch™ and ImageMatch™ services. The ColorMatch service allows the installer or interior designer to order a specific back ground color for the skin by sending in color sample (i.e. paint chip, wallpaper sample). The ImageMatch service provides the ultimate in customization. The installer or interior decorator provides a photo and DigiLinX Décor Service will use that photo as the background.
- **Cutting Edge Design** The TouchLinX is a beautiful in-wall touch pad that incorporated a glass faceplate covering the entire outside surface of the panel including the display. Capacitive touch buttons under the glass allow the user to control the system. Finally, built into the TLA250 is an OLED display displaying white text on a black background. This allows text based metadata and intuitive control screens to be accessed by the user.
- **IP Intercom** DigiLinX allows you to communicate throughout your home with room-to-room paging, room monitoring and and answering the door using the intercom.

*Designed to
Fit YOUR
Environment*

Experience the Video

DigiLinX delivers **HIGH DEFINITION UNCOMPRESSED VIDEO** over the network - over **YOUR** home network. You can see the difference in the quality picture delivered to each room of your home.

By combining content and control signals in one data stream, *NetStreams* systems offer new levels of **SIMPLICITY, RELIABILITY, AND EXPANDABILITY.**

High Definition Uncompressed Video; Quality really does matter!

DigiLinX Video

- **Uncompressed High Definition Video** DigiLinX Video Distribution solution can distribute high definition video or standard definition video, depending on the video source.
- **Video Quality** *NetStreams* PerfectPixel™ technology insures reliable delivery of video data and eliminates dropped packets across the network, resulting in pixel-for-pixel, high definition video distribution.
- **Virtually Unlimited Sources** Add as many displays video sources as your Network will allow. New products can be added now and in the future.
- **Home Theater** Integrate your home theater with *NetStreams* TheaterLinX. TheaterLinX connects your home Theater system to the rest of your Audio Video system and allows you to create a theater experience in any room of your home.
- **Synchronization** Networked Audio and Video Synchronization Technology allows any and all rooms to be perfectly synchronized when playing the same source throughout the house. No more lipsync on TVs, no more echo between rooms.

Feel the Music

DigiLinX delivers the best in multi-room audio distribution regardless of the size of the home. DigiLinX' consummate audio quality automatically synchronizes audio playback in any and all rooms in your home providing the **HIGHEST FIDELITY** in audio quality available in the market today.

DigiLinX Audio

- **Uncompressed Audio** DigiLinX converts audio from a legacy source, in real-time, into uncompressed audio streams (.WAV), allowing up to 24-bit/96kHz, studio quality audio to be distributed throughout a home.
- **Crystal Clear Sound** Uncompromising audio performance. DigiLinX puts up to 100W per channel right at the speaker. More importantly we're the only company who has worked with speaker manufacturers to tailor the amplifier characteristics to individual speaker models. You'll hear the difference. Using compatible Integrated IP or IP Ready Speakers such as Polk Audio or Atlantic technology, with DigiLinX you have the ability to have the audio in your home sound just like your standing in the recording studio.
- **Any Source, Any Where** Rich integration with sources from iPods® to CD players. DigiLinX can even get up to 6 streams of audio simultaneously from many popular media servers a feat no other system can do.
- **Doorbell/Intercom** Want to listen to your favorite MP3 when someone rings your doorbell? *NetStreams* DoorLinX provides just that capability. For added security, use compatible IP cameras to see the person ringing that doorbell.
- **Expandability** DigiLinX allows for virtually unlimited sources (Analog, Digital and Network sources) to scale and accommodate any size job. DigiLinX accepts new sources without extensive programming.
