## Downloading and Installing

### **System Requirements**

Before installing DigiLinX Dealer Setup, please make sure your computer meets the minimum system requirements.

#### Operating System

- Microsoft Windows XP SP2
- Microsoft Vista

#### Hardware

- Pentium 1.2 GHz or greater (*recommended: 2.0 GHz or greater*)
- 512 MB of RAM (*recommended: 1 GB or greater*)
- 200 MB of free hard drive space

### **Downloading DigiLinX Dealer Setup**

DigiLinX Dealer Setup can be downloaded from the password protected dealer section of *NetStreams.com*. Contact [marketing@netstreams.com](mailto:marketing@netstreams.com) if you are an authorized dealer and need login credentials.

### **Installing DigiLinX Dealer Setup**

Please note that installing DigiLinX Dealer Setup into the same directory as your current installation will *overwrite* your existing installation. You will not lose custom drivers in your driver's folder. *NetStreams* recommends backing up critical files before any DigiLinX Dealer Setup upgrade.

### **Removing DigiLinX Dealer Setup**

You can remove DigiLinX Dealer Setup in two ways: the Add/Remove Programs icon in the Windows Control Panel, accessible through the Start Menu, or using the included Uninstall program found under Start Menu, DigiLinX Dealer Setup, and Uninstall DigiLinX Dealer Setup. Please note that removing DigiLinX Dealer Setup will also remove any drivers you may have added to the driver's folder.

### **Known Issues**

The following is a list of known issues and their associated workarounds in DigiLinX Dealer Setup 2.46. For questions about these issues, please contact *NetStreams* Technical Support (see "How to Get Support" below).

Marantz Tuner (ST7001) locks up when controlled by the MLA4000 via RS-232. Please use the MLA101 to integrate the Marantz tuner.

Polk Audio Sirius Tuner needs to be put into pass through mode to enable RS-232 control on the device. If power to the tuner is lost it defaults back to factory setting (non-RS-232 mode). *NetStreams* recommends using the Sirius branded tuners as they do not exhibit this behavior.

There are no additional known issues for this release. Please see past release notes for older known issues. Issues remain classified as known until fixed.
