INFOCOMM INTERNATIONAL CERTIFIES *NetStreams' DigiLinX*

TRAINING PROGRAM

InfoComm Members Earn Certified Technology Specialist Renewal Units

by Taking *DigiLinX's* Training and Coursework Online or Onsite

AUSTIN, Texas – January 30, 2006 -- *NetStreams*[®], the global leader in entertainment systems based on Internet protocol (IP) technology, announced that its *DigiLinX*[™] training program has been certified by InfoComm International, the leading trade organization for the commercial A/V communications professional. InfoComm members can now earn Renewal Units (RU's) that count towards member's Certified Technology Specialist certification status by attending and completing *DigiLinX* Audio Distribution System coursework. Courses can be completed either online at the NEW *NetStreams* University at www.netstreams.com or onsite, offering members credits on a two-for-one basis.

"As the industry moves from the traditional analog-based A/V system to one that is all digital, IP-Based distribution and control systems, like *DigiLinX*, represent the future of the industry," said Herman Cardenas, founder and chief executive officer of *NetStreams*. "We anticipate there will be a high demand for *DigiLinX* training and certification as we move into 2006."

The *DigiLinX* Audio Distribution System is the world's first completely IP-Based Multi-Room Audio and Control System for both the residential and commercial markets. Using *NetStreams'* IP-Based patent pending *StreamNet*[™] technology, *DigiLinX* distributes audio and video over CAT5e Ethernet TCP/IP architecture.
