NETSTREAMS LAUNCHES NEW DIGILINX DÉCOR SERVICES

New Turnkey Solution Allows Dealers to Deliver Professional Quality Design

Customization Quickly, Simply, and Cost Effectively

AUSTIN, Texas | January 19, 2009 | Taking in-wall touchpad customization to a new level, *NetStreams™*, the global leader in networked A/V systems based on Internet Protocol (IP) standards, announced the launch of DigiLinX™ Décor Services, a new turnkey program aimed at its installers. The new service comprises two offerings, the ColorMatch™ solution or the premium ImageMatch™ solution, allowing the look of the *NetStreams* TLA250 in-wall touchpad to be color matched or pattern matched to the customers' wall or room décor. Installers can now provide their customers with designer-friendly skin customizations for perfect wall matches all the time, every time.

Customizing the look of high-end systems has always been a desire of homeowners and designers alike. In the past this customization either involved custom painting or the purchase of expensive custom face plates for switches, keypads and touchpanels. The recently launched TouchLinX TLA250 changes that, with a complete glass finish and customizable under-layer homeowners can have virtually any look they want.

For integrators, creating customized layers needed to be quick, simple, and cost effective while at the same time producing a quality look. The DigiLinX Décor services address this need. The ColorMatch service allows the installer to order a specific

background color for the skin of the TLA250 by using a color sample (e.g. paint chip or color chart). The installer sends *NetStreams* the color sample and a color matching swatch is sent back to be installed on the TLA250. Moving to the premium service, ImageMatch, provides ultimate customization by creating virtually any look for the TLA250 from a picture or image. Both services are available as pre-packaged kits from *NetStreams*.

“*NetStreams* continuously strives to deliver value to our dealers in new and differentiated ways,” said Sanjay Castelino, VP of Marketing and Business Development of *NetStreams*. “The DigiLinX Décor services allow dealers to fulfill the unique customization value proposition of the TouchLinX quickly and cost effectively, meeting the homeowner and designer needs.”

The DigiLinX Décor Services program is only available from *NetStreams* and in conjunction with the TouchLinX TLA250. Both services are available now.

About *NetStreams*

Headquartered in Austin, Texas, *NetStreams* delivers the Ultimate IP A/V Experience by distributing high definition audio and video over TCP/IP networks. *NetStreams*' products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, *NetStreams* solutions are a smart investment. *NetStreams* is enabling the future of IP A/V – today.
