NETSTREAMS' DIGILINX NAMED FINALIST FOR 2006 SCN / INFOCOMM

INSTALLATION AWARD

AUSTIN, Texas – May 11, 2006 – *NetStreams*[®], the undisputed world leader in digital entertainment systems based on Internet protocol (IP) technology, announced that its *DigiLinX*[™] Audio Distribution System has been selected as a finalist for the 2006 Installation Awards. The winners will be announced at 2006 InfoComm International Show in Orlando, Florida.

The *DigiLinX* Audio Distribution System is the world's first completely IP-Based Multi-Room Audio Distribution system. Offering superb sound quality with synchronized sound to multiple rooms, integration flexibility, and simple installation and operation in an open source architect, it does not require the extensive programming found on typical distribution systems.

The Installation Awards, created by the International Communications Industries Association (ICIA) and CMP Information, Inc., recognize excellence in the integration of audio, video, control and networking products in the installation market. A panel of industry experts judged nominated products and determined the final list of nominees, with winners decided by a Systems Contractor News readers' poll.

About NetStreams
