NETSTREAMS LAUNCHES NEW TOLL FREE NUMBER FOR DEALERS

AUSTIN, TX (August 15, 2005) -- *NetStreams*[®], the global leader in networked entertainment systems based on Internet Protocol (IP) technology, has implemented a new technical support toll-free telephone number for its dealers. The new number is 866.353.3496.

According to technical services manager Cliff Larsen, the new number is staffed Monday through Friday from 8:00 a.m. to 5:00 p.m. (CST) and is specifically designated for *DigiLinX*[™] and *Musica*[™] distributed audio systems technical support. Assistance for the Sales group will continue through *NetStreams* main number.

In addition to adding the toll free number, *NetStreams* has doubled its front-line customer support team to better serve incoming callers. Dealers can also continue contacting *NetStreams* technical support 24/7 through e-mail at support@netstreams.com.

"One of *NetStreams*' strategic initiatives this year was to greatly improve the quality of our technical support for our dealers," said Petro Shimonishi, vice president of marketing. "In fact, Herman Cardenas, our CEO, and I have spent a great deal of time calling dealers to learn how we can improve our support and our products. This new toll free number is just one of many improvements to come."

The implementation of this toll free number coincides with a company-wide initiative to switch from a hard-wired telephone phone system to a Cisco-based VoIP telephone system, a strategy that fits the company's profile as it launches IP-based distributed entertainment in the custom electronics field.
