**NETSTREAMS WINS MULTI-ROOM A/V PRODUCT OF THE YEAR FROM
SOUND & VISION MAGAZINE**

***NetStreams DigiLinX* IP-Based Multi-Room Audio System Honored at the
Consumer Electronics Show**

AUSTIN TX – January 19, 2007 – *NetStreams*[®], the global leader in networked entertainment systems and technology based on Internet Protocol (IP), announced the *DigiLinX*[™] Audio Distribution system was named co-winner of the Multi-Room A/V Product of the Year award by *Sound & Vision*, the world's largest entertainment magazine. *DigiLinX* is the world's first fully IP-Based Multi-Room Audio Distribution system. As an entertainment system based on computer networking technology, *DigiLinX* offers advantages in performance, cost, and ease of installation, systems integration, and scalability.

DigiLinX was one of just 22 products chosen by the magazine's editors and reviewers from the scores of products the magazine's editors tested throughout the year. To select the award winners, *Sound & Vision* asked its staff to nominate products that stand out by virtue of their innovation, performance, build quality and value. This list is then whittled down in editorial meetings where each product's merits are defended and debated. *NetStreams* IP-Based *DigiLinX* product line received top honors in the Multi-Room A/V category. Also receiving top honors was the Polk Audio LC265i, an advanced IP-Based loudspeaker designed with *NetStreams*' *StreamNet*[™] technology.

The
IP-Based
Distributed
Entertainment
Company

"We are honored and elated to receive the *Sound & Vision* award," said Herman Cárdenas, Founder and Chairman of the Company. "*NetStreams* has lead the industry into the emerging era of IP-Based entertainment systems, and will continue to deliver on this promise in 2007 when we deliver IP-Based Video and HDTV distribution to the *DigiLinX* system. We appreciate Sound and Vision's recognition with this most prestigious award and also for the recognition of Polk Audio's outstanding IP Speaker, which also uses *NetStreams* technology."

In honoring *DigiLinX* as the Multi-Room product of the year, *Sound & Vision* cited it as, "breaking new ground in both innovation and performance . . . [offering] an exciting glimpse of audio distribution's future."

About *DigiLinX*

NetStreams DigiLinX family of IP-Based products offer distributed entertainment and control with capabilities never seen before. *DigiLinX* features plug and play architecture with a rich user experience only available in highly custom systems today. *DigiLinX* delivers on the promise of convergence -- effectively marrying networking technologies with hi-fidelity audio and video -- leading the way in 'Networked Digital Entertainment'.

About *NetStreams*

Headquartered in Austin, Texas, *NetStreams* is the world leader in digital entertainment networks, based on Internet protocol (IP) technology. *NetStreams'* IP-Based systems, are designed for residential and commercial use, and offer new levels of affordability, simplicity, reliability, and expandability, benefiting both installers and end-users with lower costs for installation and set-up, with an intuitive and rich user experience.

By utilizing its patent-pending *StreamNet™* technology, *NetStreams* systems enables true plug-n-play integration with other products for entertainment, automation, security, and communications. *NetStreams* is committed to utilizing cutting-edge human factors engineering to create entertainment systems that are truly user-friendly and future compatible. *NetStreams* is enabling the future of IP-Based entertainment today.
