NETSTREAMS LAUNCHES ONLINE TRAINING AND CERTIFICATION

PROGRAM FOR DEALERS

'NetStreams University' Covers *DigiLinX* IP-Based Multi-Room Audio and Control Product Line

AUSTIN, TX, -- November 9, 2005 – *NetStreams*[®], the global leader in networked entertainment systems based on Internet protocol (IP) technology, announced the launch of ***NetStreams University***, an online training and certification program for its *NetStreams DigiLinX*[™] IP-Based Multi-Room Audio and Control System. Designed to offer flexibility and accommodate the needs of busy dealers who meet certain qualifications, online training and certification courses can be accessed anytime at the dealer's convenience.

"We have been holding training and certification programs for qualified dealer candidates through our distribution partner AVAD, but demand has grown to the point where we need an online facility to meet dealer needs," said Petro Shimonishi, vice president of marketing. "This new online program enables us to train and certify dealers quickly and efficiently, at their convenience. In addition, Internet-based training means we can expand to include our international dealers as well."

NetStreams University will go live at the beginning of December.

As a limited distribution line, only authorized dealers carry *DigiLinX*. In becoming an authorized *NetStreams* reseller, dealers first must submit an application to their *NetStreams* regional sales manager. Once accepted, they must complete four online training modules on Technology, System Design, Products, and System Installation and Configuration within 90 days. Once dealers complete all modules they receive certification from *NetStreams* and become an Authorized *DigiLinX* dealer.

According to Shimonishi, *NetStreams* will continue to also hold onsite scheduled *DigiLinX* certification training programs at local AVAD locations. These trainings typically last five hours.
