NETSTREAMS ANNOUNCES NEW DRIVER FOR VANTAGE/LEGRAND'S

INFUSION LIGHTING SYSTEM

New *DigiLinX* Driver is Plug-n-Play, Offers Two-Way IP to RS-232 Control

ANAHEIM, Calif., – August 1, 2007 – *NetStreams*[™], the global leader in networked entertainment systems and technology based on Internet Protocol (IP), has released a new driver for controlling Vantage/Legrand's InFusion lighting control system via *NetStreams*' *DigiLinX*[™] IP-Based Distributed Audio, Video and Control solution. Offering two-way IP to RS-232 control, the driver will be embedded in the *NetStreams* *DigiLinX* dealer setup program v2.0 and available to authorized *DigiLinX* dealers mid-September.

"From its inception, *NetStreams* has placed a high importance on partnerships and we continue to expand our integration ecosystem by adding this plug and play driver for *DigiLinX* control of the Vantage InFusion lighting system," said Petro Shimonishi, *NetStreams* Vice President of Marketing and Product Management. "We've received quite a lot of requests from installers for Vantage lighting integration and we are excited to make this driver available to our dealers. Instead of trying to develop, market and sell everything to everyone, *NetStreams* continues to focus in on what it does best – deliver the best quality audio and video, and control over TCP/IP."

"By collaborating with *NetStreams*, the InFusion controller and *DigiLinX* work together

seamlessly to provide a superior integration tool for the installer,” said Tim O’Laughlin, Third Party Integration Director for Vantage/Legrand.

Integrating Vantage/Legrand’s InFusion controller for control by *DigiLinX* is extremely easy. All an installer has to do is program the lighting scenes for Vantage/Legrand’s InFusion controller, connect a *NetStreams ControLinX™* via RS-232 to the InFusion Lighting controller, select the driver in the *DigiLinX* dealer setup program and name the lighting scenes. The scenes for each room are then available for easy selection and activation via the *NetStreams TouchLinX™* in-wall touch screen controllers, or other web browser device connected to the network, such as a wireless web tablet, PC, Mac, or PDA.

About NetStreams

Headquartered in Austin, Texas, *NetStreams* is the undisputed world leader in digital entertainment networks based on Internet protocol (IP) technology. *NetStreams’* IP-Based and IP-controlled systems, designed for residential and commercial use, handle any number of digital or analog sources and deliver uncompressed content, including high definition audio and video, to an unlimited number of zones. By combining content and control signals in one data stream, *NetStreams* systems offer new levels of affordability, simplicity, reliability, and expandability, benefiting both installers and end-users with lower costs for installation, set-up, and support.

By utilizing its patent-pending *StreamNet™* technology, *NetStreams* systems enable true plug-n-play integration with other makers’ products for entertainment, automation, security, and communications, as well as remote access for control, management, and software upgrades. They provide a stable, easily expandable platform for future products (hardware and software) and new applications. *NetStreams* is committed to utilizing cutting-edge human factors engineering to create entertainment systems that are truly user-friendly and future compatible. *NetStreams* is enabling the future of home entertainment today.

About Vantage/Legrand

For more than 20 years, Vantage/Legrand has been the technology leader in automation and lighting control. With many thousands of installations in operation worldwide, Vantage/Legrand has developed reliable and convenient solutions for almost every automation challenge. The 2006 introduction of the InFusion system moves Vantage/Legrand well ahead of competitors, making complex lighting control simple, full-featured integration easy, and automation dreams affordable. Vantage/Legrand dealers report significant installation and programming cost savings over competing systems, which allows less expensive system pricing and greater profitability for dealers. Vantage/Legrand is your first choice in automation and lighting control. Headquartered in Orem, Utah, Vantage/Legrand distributes its products through a worldwide network of certified representatives, dealers and installers.
