**NETSTREAMS WINS INNOVATIONS AWARD FROM CONSUMER ELECTRONICS ASSOCIATION**

**IP-Based 'Streaming Music Manager' to be Showcased at 2007 International CES**

**AUSTIN, TX., – November 30, 2006** – *NetStreams*<sup>®</sup>, the global leader in networked IP-Based entertainment products, announced The Consumer Electronics Association (CEA<sup>®</sup>) selected *NetStreams*' Streaming Music Manager for a 2007 CES Innovations Design and Engineering Award. A panel of independent industrial designers, engineers and journalists select winners of this award, given annually.

*NetStreams*' Streaming Music Manager, part of the *DigiLinX*<sup>™</sup> Multi-Room Entertainment and Control system, automatically finds and indexes all music files located on any device – computer, MP3 player, audio server, etc. – in the *DigiLinX* network, and lets users select and play any track without having to know where the file is stored. Using proprietary software, the Streaming Music Manager creates a database by constantly monitoring and indexing music files available on the system, including music on devices connected via USB. When someone chooses to listen to a song, the system finds and plays the file. The Streaming Music Manager also allows six different music selections to play simultaneously in different rooms.

"The Streaming Music Manager is another great example of how IP technology improves and simplifies the home entertainment experience," said Kevin Reinis, President and CEO of *NetStreams*. "We are honored to receive this award."

The  
IP-Based  
Distributed  
Entertainment  
Company

*NetStreams'* Streaming Music Manager will be displayed at the 2007 International CES, which runs January 8-11, 2007 in Las Vegas, Nevada. The Innovations Design and Engineering Showcase will be located at the Sands Expo and Convention Center, Booth #68747.

### **About *DigiLinX***

*NetStreams DigiLinX* family of IP-Based products offer distributed entertainment and control with capabilities never seen before. *DigiLinX* features plug and play architecture with a rich user experience only available in highly custom systems today. *DigiLinX* delivers on the promise of convergence -- effectively marrying networking technologies with hi-fidelity audio and video -- leading the way in 'Networked Digital Entertainment'.

### **About *NetStreams***

Headquartered in Austin, Texas, *NetStreams* is the world leader in digital entertainment networks, based on Internet protocol (IP) technology. *NetStreams'* IP-Based systems, are designed for residential and commercial use, and offer new levels of affordability, simplicity, reliability, and expandability, benefiting both installers and end-users with lower costs for installation and set-up, with an intuitive and rich user experience.

By utilizing its patent-pending *StreamNet™* technology, *NetStreams* systems enables true plug-n-play integration with other products for entertainment, automation, security, and communications. *NetStreams* is committed to utilizing cutting-edge human factors engineering to create entertainment systems that are truly user-friendly and future compatible. *NetStreams* is enabling the future of IP-Based entertainment today.
