New NetStreams “iLinX” App Turns iPhone® into Full-Function Touch

Screen Remote for DigiLinX A/V Distribution and Control System

iLinX Enables Wireless Touch Screen Control From Any Model iPhone® or iPod Touch®; Uses Seen For Residential and Commercial Systems

AUSTIN, Texas | June 2009 | Adding the convenience of iPhone/iTouch control to its multi-room A/V distribution system, *NetStreams™*, the global leader in networked A/V systems based on Internet Protocol (IP) standards, has introduced *iLinX™*, the first downloadable software enabling full control of the *NetStreams’ DigiLinX™* Multi-Room A/V Control system using the Apple iPhone or iPod Touch.

The application’s developer is Janus Home Systems of England, a long-time *NetStreams* integrator with extensive experience in DigiLinX installation and setup. The application is available through the iTunes store at a cost of \$149.99.

“The *iLinX* app is another way we are expanding the DigiLinX eco-system for customers and maximizing the benefits of our IP-Based system,” said Kevin Reinis, president and CEO of *NetStreams*. “For iPhone and iPod Touch users with DigiLinX, *iLinX* lets them add a full-featured touch screen remote to their system without purchasing additional hardware. That’s a great value.”

-MORE-

According to Reinis, iLinX utilizes NetStreams' StreamNet™ technology, which enables the iPhone to provide a user interface with the same features, characteristics, and system control capability of any DigiLinX touch screen controller. For example, while running iLinX, an iPhone can display media metadata and provide control over every device connected to the DigiLinX network, such as media sources, speakers, video screens, intercom, lighting systems, HVAC systems, security cameras, pool and even the fireplace.

Upon start-up, iLinX immediately discovers all devices connected in the DigiLinX system. There is no setup required. Fast and feature-rich, the app runs on the iPhone without any intervening website so that response time is virtually instantaneous. Any updates or changes to the DigiLinX set up program are automatically sent to the iPhone/iPod Touch when iLinX is launched. The iLinX website, <http://www.ilinx.info>, provides ongoing technical and user support.

About Janus Home Systems

Janus Home Systems is a technology consultancy specializing in the CI market that provides software developments for both manufacturers and installers. The team at Janus has a background in manufacturer development and extensive experience in AV installation, which gives them a unique perspective into the CI market. About NetStreams

Headquartered in Austin, Texas, *NetStreams* delivers the Ultimate IP A/V Experience by distributing high definition audio and video over TCP/IP networks. *NetStreams'* products, designed for commercial and residential use, offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream and incorporating industry standards, *NetStreams* solutions are a smart investment.

NetStreams is enabling the future of IP A/V – today. For additional information on *NetStreams* and its innovative products, please visit www.netstreams.com.

About StreamNet Technology

NetStreams' patent and patent-pending StreamNet technology enables licensees to deliver complete IP-based audio/video distribution solutions over TCP/IP networks. *StreamNet* technology provides an end-to-end IP ecosystem for plug-n-play connectivity, A/V signal synchronization, high performance A/V reproduction, automatic device discovery and configuration, network control, and more. All products that carry the 'StreamNet Connected' logo are interoperable, enabling easy integration of audio/video and control products from multiple manufacturers. *StreamNet* provides a stable, easily expandable platform and toolset for future products and new applications. *StreamNet* enables manufacturers to deliver the future of A/V and IT convergence today. For more information, visit www.streamnetconnected.com.
