

Panorama™ Integration with Musica™

- High Definition Video Distribution
- 4 global source inputs
- Control system with Musica keypad and remote
- Easy to Install
- Affordable

The NetStreams' Panorama Video Distribution system integrates easily with the NetStreams Musica Multi-Room Audio system to provide the best quality Multi-Room Audio / Video system at an affordable price. Select and control the audio and video sources from a Musica keypad or Musica remote control. The displays or projectors in each room can also be controlled by the Musica keypads.

Note-All Video input and output connections must be the same.

Use a second Panorama PAN6400 to distribute S/PDIF multichannel audio!

CAT5

The NetStreams' Panorama Multi-Room Video system distributes HDTV quality video at an affordable price. Much more than a traditional matrix switch, the Panorama system also controls the displays in each zone of video and can control the video sources at the head end when used with the Panorama PANVP700 video port.

Note-All Video input and output connections must be the same.
