THE ULTIMATE IP A/V EXPERIENCE

Musica Multi-Room Audio

ENJOY THE BENEFITS OF HOME MULTI-ROOM AUDIO

Imagine being able to listen to your favorite music in any room without the clutter of equipment and wires. Whether you're entertaining guests, doing work around the house, or just relaxing, The Musica™ audio system is a great way to enjoy music wherever and whenever you like.

You can play the same music in every room, or select different sources for each room. You can even connect your TV, computer, games or MP3 player. Musica can be configured for one room, 18 rooms or anything in between!

- 5-band graphic equalizer
- 3D Sound Mode (select keypad models)
- Optional FM tuner card
- Control from a PC, web tablet, or PDA

Shown in Almond, Ivory and Black

INTUITIVE AND INTERACTIVE IN-WALL KEYPADS

NetStreams' Musica system has an advanced design which deliver superb audio performance and features interactive keypads that are very easy to use. Netstreams' technology places powerful digital amplifiers in each zone, close to the speakers. This efficient design improves sound quality by reducing noise, distortion and power losses as well as increasing reliability and simplifying the installation. An attractive LCD screen provides the status of the system and guides you through controlling audio in any room in your home. Three models are available with different amplification and backlighting so your installer can design a perfect fit for each room. Choose between White, Almond, Ivory or Black faceplates match your décor.

With an optional module, Musica enables you to control all of your audio sources using a web browser on a PC, web tablet, or PDA. Turn the music on and off in any room, control the volume, even tune radio stations! Plus, your installer can connect your MP3 player or your computer to Musica and play your favorite music or internet radio in any room.

INTEGRATION WITH PANORAMA

Panorama™ can be used as a stand alone video distribution system or integrated with NetStreams' Musica 5000 series Distributed Audio system. Panorama also easily integrates with NetStreams' DigiLinX™ IP-Based Distributed Audio and Control system, or other control systems via RS-232 or IR.

Panorama Multi-Room Video

ENJOY HIGH DEFINITION VIDEO THROUGHOUT YOUR HOME

Enjoy high definition picture quality picture in any room of your home with *NetStreams* Panorama video distribution solution. *NetStreams*' Panorama is a point to multi-point, line-level video distribution system, distributing up to four HDTV quality video sources to six displays. Using standard CAT5e cable, Panorama provides a high quality, consistent signal regardless of the distance of the cable run, up to 1,000 feet. There is no signal degradation; the last monitor looks as good as the first - and every monitor in between.

- Distribute Video up to 1000 Feet Away
- 4 HDTV (1080i) Video Sources
- Composite, S-Video or Component Connections

With *NetStreams*' Panorama, the opportunities are endless. Check out the “[solutions](#)” section of the *NetStreams* website to learn more.

NetStreams sells to consumers through trained and certified installers. Want more information? Visit the “[contact us](#)” section of the *NetStreams* website today.
